# About Racktech

Racktech specialises in rack system enclosures and accessories for the communications, data, electronic, security and electrical industries.

Rack Technologies was founded in Sydney, Australia in March 1990 and acquired by Preformed Line Products (Australia) Pty Ltd in April 2000.

After 30 successful years in business, the name changed to Racktech in March 2021.

The company's dedication to continuous improvement in all areas of the business from innovative design features and exceptional customer service are the keys to our success.

Racktech maintains a dominant position in the market due to our competitive pricing and comprehensive product range, manufactured to the highest standards.

Racktech products meet the requirements of AS/NZS ISO 9001-2016, IEC 60297 and EIA-310.

Our design features and accessories assist with prolonging the life of sensitive electronic equipment that lead to future cost savings.

Racktech is committed to providing unrivalled products and services. Our pricing, range and quality combined with local service ensures our valued customers will receive the best product.

A photograph of a server room with rows of black server racks. The racks are arranged in a long aisle, and the floor is a light-colored tile. The racks have perforated doors and are on casters. The lighting is bright, and the overall atmosphere is clean and professional.

RTX Series cabinets ready for dispatch at the production facility Glendenning, NSW.

7 RTX Series

RTX Series – Pre-configured Range 2

RTX Series is a pre-configured floor standing cabinet range ready for delivery.

More than 90 size and door variations ensures a cabinet that will suit any installation requirement.

RTX cabinets are the perfect solution for educational facilities, small to medium size businesses, low density commercial applications and communication rooms.

The series has three door options and many standard inclusions, comprising power distribution units, fans, shelves and vertical cable management systems.

The cabinets are supplied fully assembled, enabling quick installation and easy maintenance with time and cost savings. The fully welded frame provides strength and all doors and panels are designed for easy removal enabling unobstructed access for wiring during installation.

Features 3

- > An economical range with many standard inclusions
- > Doors open to 180° degrees with quick release hinges
- > Glass, Steel or Curved Vented front door options
- > Curved vented front door protrudes 50mm
- > Vented rear doors (Bifold for 800mm wide cabinets)
- > Vented doors have 70% perforation for efficient airflow
- > Swing handle with lock for both front and rear doors
- > 19" depth adjustable mounting rails with RU markings
- > Side panels fitted with round locks are easy to install and remove
- > Top and bottom panel has multiple cable entry knockouts
- > 800kg static load capacity on levelling feet

## WR Series

The WR Series wall mounted cabinets are built to the highest standards and are easy to install.

Racktech's extensive range with flexible components makes the WR Series the most comprehensive in today's market.

## WR Series – Wall Cabinets

The WR Series wall mounted cabinets are built to the highest standards with flexibility and ease of installation at the forefront of the design criteria.

More than 30 different size and door variations makes the WR Series one of the most comprehensive in the market.

The fully welded frame ensures a stable structure while the key lockable quick release door opens to 180° degrees.

Doors are available in Acrylic, Steel or Curved Vented.

Removable side panels with locks and cable knockouts in the top and bottom panels enables easy access during wiring and fitout.

Single section wall cabinets are supplied complete with removable rear panel. The installation is simple with a Quick Mount Rail that is fixed to the wall, enabling one person to install the cabinet.

Double section wall cabinets come with a rear section with reversible lift off hinges, providing easy access and enabling one person to install the cabinet.

For quality and range of features you cannot go past the WR Series cabinets.

### Features

- > Fully welded frame
- > Removable side panels with locks
- > Removable rear panel
- > Adjustable mounting rails with RU markings
- > Quick release door hinges facilitate easy installation
- > Reversible doors open to 180° degrees
- > Acrylic, Steel or Curved Vented doors are available
- > Curved vented front door protrudes 50mm with 70% perforation for efficient airflow
- > Top and bottom panel with multiple cable entry knockouts
- > Cabinets can be fixed directly to the wall or attached to a hinged wall bracket
- > Hinged wall bracket is lockable and contains knock-outs for cable entry. Hinge wall bracket adds 100mm to the depth
- > Rear hinge section can be hinged on the left or right hand side
- > Rear hinge section is key lockable and has 19" provisions
- > Single Section wall cabinet has 50kg load capacity when directly mounted to wall
- > Double Section wall cabinet has 40kg load capacity when directly mounted to wall
- > Black is the standard colour
- > Fans are an optional inclusion

## Single Section Wall Cabinets

### Standard Inclusions

- > 1 x cantilever shelf (1RU 300mm deep cantilever)
- > Key lock on front door
- > Key locks on removable side panels
- > Cable entry knockouts top, bottom and rear
- > Fan vents in top
- > 19" front and rear mounting rail with RU markings
- > Earth stud
- > 25 cage nuts and screws
- > Quick Mount Rail

### Optional Fan Inclusions

- > Single fan unit for 450mm deep cabinet – Part Number: 9181
- > Double fan unit for 600mm deep cabinet – Part Number: RT9182

RTX cabinets are the perfect solution for educational facilities, small to medium size businesses, low density commercial applications and communication rooms.

The series has three door options and many standard inclusions, comprising power distribution units, fans, shelves and vertical cable management systems.

The cabinets are supplied fully assembled, enabling quick installation and easy maintenance with time and cost savings.

The fully welded frame provides strength and all doors and panels are designed for easy removal enabling unobstructed access for wiring during installation.

### Features

- › An economical range with many standard inclusions
- › Doors open to 180° degrees with quick release hinges
- › Glass, Steel or Curved Vented front door options
- › Curved vented front door protrudes 50mm
- › Vented rear doors (Bifold for 800mm wide cabinets)
- › Vented doors have 70% perforation for efficient airflow
- › Swing handle with lock for both front and rear doors
- › 19" depth adjustable mounting rails with RU markings
- › Side panels fitted with round locks are easy to install and remove
- › Top and bottom panel has multiple cable entry knockouts
- › 800kg static load capacity on levelling feet

Note: \*Height includes castors (72mm)

### Standard Inclusions

All RTX Series cabinets come with the following inclusions:

- › Fully welded cabinet frame
- › Top and bottom panel
- › 2 x fan units (600 depth)
- › 4 x fan units (800 to 1200 depth)
- › Swing handle with lock for both front and rear doors
- › Locks for side panels
- › 2 x fixed shelves (12RU to 27RU)
- › 3 x fixed shelves (37RU to 45RU)
- › 1 x 8-way horizontal PDU
- › 2 x cable trays (150 wide)
- › 2 x vertical cable ducts (800 cabinet)
- › 25 cage nuts
- › Earth Kit
- › Castors for transport (72mm high)
- › Levelling feet
- › Baying Kit

## Benefits of Server Rack Cabinets

The most important component of any network is the server. The server should be protected and maintained at all times.

Storing your IT equipment in server rack cabinets helps to keep the work environment organised and tidy.

Server rack cabinets minimise safety risks and prolong the life of your network.

Below are three major benefits of server racks.

### Server Rack Features

- > High airflow vented doors
- > Vertical and horizontal cable management
- > Roof mounted fan trays
- > Power rails (basic or monitored)
- > Keyboard trays
- > Fixed or sliding shelves
- > Joining kits
- > Blanking panels

### High Performance

Rack cabinets are designed to keep the server and other IT equipment securely in place.

Servers require constant airflow to work properly.

If the airflow around the server is obstructed, the performance will be greatly reduced

Insufficient airflow will increase the temperature around the server leading to potential overheating.

If the airflow is your priority, purchase a server rack with a cooling system.

### Easy Maintenance

Maintenance is the key to a long service life and the proper operation of your server and IT equipment.

Server rack cabinets facilitate easy access, enabling IT technicians to maintain and solve network problems quickly for reliable network performance.

Network cables are organised ensuring every component in the network is in the right place.

Server racks are available with many features including wheels, left and right hinges, and easy to remove doors and panels.

### Increased Security

Server Cabinets have added security options including protective doors and three-point locking systems to ensure your IT equipment will remain safe from unauthorised access.

All of these features will help you get the most out of the server.

Server rack cabinets can be easily customised to meet your specific project requirements.

## RT2 Series

The RT2 Series is a custom design range with multiple size and panel configurations available.

The cabinets are suitable for the iQ cable management system to be fitted within the enclosure.

Contact Racktech for assistance with your product and project requirements. Call 1300 550 322, email [sales@racktech.com.au](mailto:sales@racktech.com.au) or visit [www.racktech.com.au](http://www.racktech.com.au)

## RT2 Series – Custom Configured Range

The RT2 Series is a custom design range with multiple size and panel configurations available.

The cabinets are suitable for the iQ cable management system to be fitted within the enclosure.

### Features

- > 600mm and 800mm width cabinets
- > Modular Frame
- > Superior weight to strength ratio
- > Modular design with aluminum extrusion
- > Durable powder-coated finish
- > Cabinet is designed for strength and flexibility and can take up to 1000kg static load capacity
- > Fully adjustable mounting rails with RU markings for quick installation
- > Doors are available in acrylic, steel, vented, curved vented or bifold vented
- > Doors can be left or right hand hinged
- > Concealed hinges and fasteners
- > Quick release hinges and latches
- > Vertical power rails can be mounted on uprights
- > Fans, castors, plinths, cable managers and chimneys are available
- > Large cable access entry in the roof provides access for overhead cable egress
- > Side panel with ventilation at the bottom allows for passive airflow throughout the cabinet
- > Ripple Black Gloss is the standard colour
- > Other colours are available upon request. Minimum order quantity applies
- > Flat pack option available
- > Complies with IEC 60297 and EIA-310

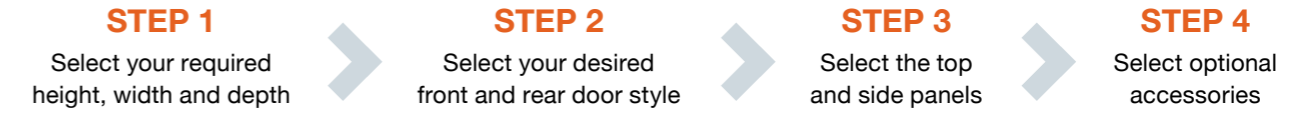

### Standard Inclusions

- > Cabinet frame
- > Front and rear mounting rails with RU markings
- > Levelling feet are included with frame heights 38RU and above (set of 4)

Cutouts for fans and large cable access in the roof

### RT2 Series Custom Build Process

### Door Options

### Side Panel

Adjustable mounting rails with RU markings facilitate quick installation

Doors have quick release hinges and latches for easy installation

Side panel with ventilation allows air to flow throughout the cabinet

Three-point locking system can be retrofitted to doors for additional security

Vertical power rails can be mounted on uprights to save RU space

Frame Size

600W Cabinet Frame Assembly

800W Cabinet Frame Assembly

- Available Height**  
12RU, 18RU, 27RU, 38RU,  
42RU and 45RU
- Available Depth**  
600mm, 800mm, 900mm,  
1000mm and 1200mm
- Available Width**  
600mm and 800mm

Accessories

- > Doors
- > Top Panels
- > Side Panels
- > Fans
- > Power Rails
- > Cable Management
- > Cabinet Plinth and Plinth Gland
- > Castors (Set of 4)
- > Acoustic Foam Kit
- > Flat pack option available

Cabinet Plinth

Cabinet Plinth Gland

Castors (Set of 4)

Acoustic Management

The RT2 Series optional Acoustic Foam Kit is ideal for environments where people are in close proximity to cabinets populated with noisy IT equipment such as servers, switches and UPS systems.

The Acoustic cabinet is designed to reduce noise output for a more comfortable environment.

Excess heat generated by the active equipment needs to be managed carefully. We recommend thermostatically controlled and whisper quiet fan kits to assist with better airflow management and to ensure heat is dissipated correctly.

The thermostat enables you to set the temperature and fan speed, which also helps manage the noise level of the fans kits.

The attenuation foam reduces the decibel rating dramatically, ensuring a pleasant and enjoyable workplace, which also minimises health issues.

Standard Inclusions

- > RT2 Series frame  
(Choose the frame size W x H x D)
- > Equipment rails with RU markings
- > Front and rear lockable solid steel doors
- > Lockable and removable side panels
- > Top panel
- > Bottom panel
- > Acoustic foam
- > Levelling feet

Optional Inclusion

- > Whisper quiet 2, 4 or 6 fan trays
- > Fan trays available with a top or bottom mount depending on application and environment

## Racks Vs Cabinets

Data centres are continuously impacted by the rapid developments and improvements in technology.

Efficient power usage is a major focus for data center installations and there has been a shift towards enclosed cabinets as opposed to open frame racks.

Despite the latest trend towards using enclosed cabinets, open frame racks still present a viable solution for many data centres.

While there is no right or wrong decision when it comes to choosing an enclosed cabinet versus an open frame rack, it's worth considering the advantages and disadvantages of both systems.

### Open Frame Rack – Advantages

Open frames are suitable for a variety of applications including supporting active equipment such as switches and servers to provide a cable patching platform.

Cost is the number one reason for selecting an open frame rack versus an enclosed cabinet. A complete rack solution including cable management accessories can be half to a third of the cost of an equivalent enclosed cabinet configuration.

Secondly, open frame racks are designed to allow unobstructed airflow while also enabling easy access to the equipment and cabling. The absence of side panels facilitates easy access even when active equipment and cables have been installed.

Thirdly, two-post open frame racks provide the most efficient use of floor space in a data centre, while the four-post open frame racks are suitable for supporting large and heavy equipment as they provide front and rear support with greater stability.

Finally, open frame racks offer the best solution for cable management. Access is not restricted by side panels or walls, enabling the installation of wide and deep vertical cable managers along both sides of the frame for optimal cable management.

### Open Frame Rack – Disadvantages

Poor security and aesthetics can be a consequence of the cost savings of an open frame rack. The active equipment is exposed to dirt and debris that can cause damage to the fans and other products.

As the equipment, cables and cable managers are clearly visible, they can create an unpleasant appearance, especially if they are not maintained.

### Enclosed Cabinet – Advantages

Two key reasons for choosing an enclosed cabinet are airflow management and security.

As the demand for technologies in relation to cloud computing and storage are increasing, equipment density per rack is also increasing as well as the associated cooling requirements.

With the use of built-in features and specially designed spaces, it is possible to create an effective separation between hot and cold air, improving cooling efficiency.

Enclosed cabinets offer the best simple solution for a variety of air segregation strategies including:

- > Cabinet level containment
- > Cold Aisle Containment
- > Hot Aisle Containment

Enclosed cabinets provide a higher level of physical security to open frame racks. Different types of locking systems are available to protect sensitive data from unauthorised access.

### Enclosed Cabinet – Disadvantages

Enclosed cabinets make maintenance operations difficult due to the restricted accessibility. The cost of enclosed cabinets are prohibitive for many data centres, especially small operations or start-up businesses.

*“Choosing the right option for an installation often comes down to a balance between efficiency and the specific requirements of the project.”*

### Making the best choice

When comparing open frame racks to enclosed cabinets, it is important to consider all the factors that will impact on the life of the installation and choose a solution that will best serve the core requirements.

In summary, an enclosed cabinet will always provide greater security and better control of airflow, while an open frame rack can still be a viable option for housing a moderate amount of IT equipment or used as a main patching frame.

Open frame racks are also cost-effective, easy to access and durable, which makes them a suitable option for telecom equipment, servers or networking with a relative low power load where cooling requirements are not a major concern.

## iQ Series iQ Open Frame

The iQ Series is a quality 19” cabinet range that also provides versatility, suitable for many applications.

The iQ Open Frame System is designed for high density cabling and patching.

## iQ Series – Premium Cabinet Range

The iQ Series is a premium quality cabinet range providing flexible solutions for a variety of applications.

The cabinets are aisle containment ready with mounting holes in place for optional accessories including vertical air dams, vertical cable management and base plates.

The cabinets can be equipped with the Racktech iQ cable management system ideal for large volumes of cables and patch leads.

### Features

- › Strong frame designed with heavy-gauge mounting rails enable 1400kg static loads with levelling feet and 1000kg dynamic loads with castors
- › Vented front door with curved profile allows for more airflow with 70% perforation
- › Integrated Electrical Grounding for roof, side panels, doors and frame
- › Vertical mounting rail and integrated alignment feature enables quick installations
- › Roof panel is reversible to reposition the larger cable entries if required
- › Large cable access entry points in the roof provides access for overhead cable egress
- › Fans, castors, cable managers, PDU trays and chimneys are available
- › Black is the standard colour. Other colours are available upon request. MOQ applies

### Standard Inclusions

- › Curved vented front door
- › Split vented rear door
- › Split side panels
- › Top panel
- › Front and rear mounting rails
- › Levelling feet (set of 4)

Typical iQ Series Cabinet

Integrated Electrical Grounding

Optional Vertical Cable Managers

Rail Alignment Feature

## iQ Series Construction

### Frame

- › Strong frame design with heavy-gauge mounting rails
- › Static load ratings 1400kg on levelling feet
- › Dynamic load ratings 1000kg with castors

### Doors

- › Simple lift-off front door design with swing to 155°
- › Front door can be hinged on the left or right hand side or interchanged with rear door
- › Curved vented front door provides a modern appearance and practical ventilation solution
- › Vented front and rear doors provide airflow for servers and networking equipment
- › Split rear doors improve access and serviceability to rear of rack mounted equipment
- › Doors are fitted with swing handle and lock
- › Front and rear doors are earthed using wiring supplied

Split Side Panels

### Side Panels

- › Half height quick release side panels reduce size and weight for easy handling and access
- › Side panels are lockable using a single key provided

### Mounting rails and brackets

- › Vertical mounting rails can be easily adjusted
- › RU positions are numbered on front and rear mounting rails to help with quick installation

### Earthing System

- › Integrated earthing system on frame

**Flexible Solutions**

Cabinets are aisle containment ready with mounting holes in place for optional accessories including:

- > Vertical air dams
- > Vertical cable management
- > Base plates

- > Roof can be removed for access during installation or with cabling already in place
- > Roof is reversible to reposition the larger cable entries for power distribution plugs and connectors
- > Large cable access points in the roof enables access for overhead cable egress. The bottom panel allows for unobstructed cable access through a raised floor

- > A strong frame designed with heavy-gauge mounting rails enable 1400kg static loads with levelling feet and 1000kg dynamic loads with castors

- > Levelling feet are supplied as standard and castors are sold separately

Vertical mounting rails can be adjusted to suit any mounting equipment

Adjustment features are integrated into the cabinet for quick and easy alignment

RU positions are numbered front and back, assisting with quick equipment installation

| Cabinets | Height (mm) |          |                   | Width (mm) | Depth (mm) |                | Part Number |

**Note:** \*Cabinets are supplied with curved front door, split rear door, two side panels and levelling feet as standard inclusions.

**Top Panel Cut-out Dimensions**

**600 Wide Cabinets**

**1000 and 1200 Deep**  
two 130 x 448mm  
six 100 x 100mm  
four 60mm diameter cut-outs

Top panel showing cable access areas  
Two – 130 x 448mm, Six – 100 x 100mm, Four – 60mm Ø

**800 Wide Cabinets**

**800 Deep**  
one 448 x 130mm  
four 203 x 76mm cut-outs

Top panel showing cable access areas  
One – 130 x 448mm, Four – 76 x 203mm

**1000 and 1200 Deep**  
two 448 x 130mm  
six 203 x 76mm cut-outs

Top panel showing cable access areas  
Two – 130 x 448mm, Six – 76 x 203mm

**Note:** The above accessories are only suitable for iQ Series cabinets.

## iQ Open Frame – System

The iQ Open Frame has been designed specifically for high density cabling and patching applications suitable for communication rooms and data centres.

There are several cable management options available utilising the Racktech T-Finger vertical cable manager design available in widths of 150mm, 300mm and 400mm.

The iQ Open Frame rack can be bayed as many times as required with the vertical cable management system.

The 2-way hinged door cover design allows for ease of cable management as well as a neat and tidy finish.

The iQ Series 2-post open frame has a 500kg load rating (dependent on application) and the 4-post open frame has a 1000kg load rating. Standard colour is Black.

### iQ Open Frame System

| RU   | Height | Width | Depth | Frame    |
|------|--------|-------|-------|----------|
| 38RU | 1748   | 515   | 145   | iQOF3801 |
| 45RU | 2150   |       |       | iQOF4501 |
| 52RU | 2462   |       |       | iQOF5201 |

**Note:** The iQ Open Frame system is available in flat pack only, assembly required.

### Adjustable Joiner Kit

The adjustable joiner kit is used to join the frames together, turning a 2-post frame into a 4-post frame. The kit enables the depth of the rack to be manually adjusted to accommodate equipment.

| Part No. | Description                               |
|----------|---|
| iQOF9511 | Adjustable Joiner Kit for 600mm to 1000mm |
| iQOF9514 | Adjustable Joiner Kit for 400mm to 600mm  |

## Cable Management

The T-Finger Vertical Cable Management System is designed to handle high density cabling for termination or patching applications.

This system ensures neat cabling and adherence to bend radius requirements. A hinged door cover conserves any unsightly cables and has the ability to swing left or right for ease of cable installation.

The T-Fingers are mounted in 2RU increments and can be removed to allow the bending and entry of larger cable bundles via the top, bottom, left or right. The fingers are available in 93mm and 146mm lengths.

## iQ Open Frame – Vertical Cable Management

Vertical cable managers can be supplied with either a basic cover including plastic clips that attach directly to the vertical T-Finger (iQOF) or a dual swing door with two-point latching mechanism that is a stand alone design separate to the vertical T-Finger (iQSOF).

### iQOF

| 2RU             | iQOF9502-150 |
| 4RU             | iQOF9512-150 |

Cable Supports

- > Supports and ensures bending radii are met
- > Allows the entry of cables within the frame

| Part Number | Description   |
|-------------|---|
| iQOF9501    | Adjustable Top Water Fall Tray (Height adjustable to 60mm)    |
| iQOF9503    | Top Water Fall Support Tray (To route leads between managers) |
| iQOF9504    | 2RU Horizontal Cable Tray (To route leads between managers)   |
| iQOF9505    | Bottom Cable Tray (Used to take up the slack of leads)        |

Cable Slack Spool

Cable slack spools are used for both copper and fiber allowing minimum bend radius where the slack of the cable length is to be spooled inside the vertical management channels.

| Part Number | Length                                       |
|-------------|--|
| iQOF9506    | 70   |
| iQOF9507    | 140  |
| iQOF9508    | 210 (For extended finger and brackets only). |

Stiffener Plate

> Optional product to support Open Frames

| Part Number | Description                                   |
|-------------|---|
| iQOF9513    | Used for 150mm, 300mm and 400mm wide managers |

**Note:**

These tables list the estimated cable capacity only. The cable capacity is estimated based on 5.5mm OD Cat 5e, 6.2mm OD Cat 6, 8.5mm OD Cat 6a and 7.5mm OD Cat 7/6a shielded 4-pair UTP horizontal cable.

Cable OD varies with different size cables and specific manufacturer's cable types. To calculate recommended cable capacity for other size cables, divide the product's usable area by the area of the cable and multiply by 25% (50% for maximum fill). While every effort has been made to ensure the accuracy of all information, Racktech does not accept liability for any errors or omissions.

# Class C and Class B Series

Racktech Class C and Class B Series cabinets are manufactured to the stringent standards required by the Security Construction and Equipment Committee (SCEC).

## Class C and Class B Series – SCEC Endorsed Cabinets

Racktech Class C and Class B Series cabinets provide high-level security for data and communications equipment used in a secure network environment.

Racktech Class C and B equipment racks have been endorsed by the Security Construction and Equipment Committee (SCEC) for the protection of classified equipment applications.

Class C Cabinet

- > All frames are manufactured from corrosion resistant 2mm zinc annealed steel and fully welded with load ratings up to 800kg
- > Solid side panels are internally secured

- > Doors are manufactured using 1.5mm corrosion resistant zinc annealed steel and perforations are maximised to improve the ability to dissipate heat
- > Each SCEC endorsed door includes a 6mm anti-drill plate and an independent locking mechanism. Door styles available include solid, window or vented

- > Solid bottom panel is secured internally to provide a sturdy and stable platform that will protect classified equipment
- > The standard colour is grey nurse and other colours are available
- > Standard sizes are ex-stock

## Standard Inclusions

- > SCEC endorsed cabinet frame with front and rear mounting rails
- > Left and right solid side panels fixed internally
- > Front and rear vented door with Class C and B locking system
- > 2 x PDU trays mounted at rear
- > 1 x 100mm wide cable tray
- > Levelling feet
- > 800mm wide cabinet includes 2 x pipe baffle – one fitted top LHS and RHS
- > 600mm wide cabinet includes 1 x baffle box fitted top rear

- > All cabinets come with a unique serial number that is displayed on the label and key
- > Provide high level security for data and communications equipment used in secure network environments

- > RU positions are numbered front and back for quick installation
- > SCEC endorsed racks come with cable baffle pipe or cable baffle box as standard (depends on cabinet width, see standard inclusions above)
- > PDU tray

Cable Baffle Box

Class C and B Series Accessories

| Part Number       | Description  |
|-------------------|--|
| RTC-BAFFLE-L800W  | Class C and B Cable Raffle Large for 800W Cabinets                           |
| RTC-BAFFLE-M800W  | Class C and B Cable Raffle Medium for 800W Cabinets                          |
| RTC-BAFFLE-S800W  | Class C and B Cable Raffle Small for 800W Cabinets                           |
| RTC-BAFFLE-XL800W | Class C and B Cable Raffle Extra Large for 800W Cabinets                     |
| RTC-6FAN          | Class C and B 6 Fan Tray Door, Roof Mount for 800W, 1050D and 1200D Cabinets |
| RTC-3FAN          | Class C and B 3 Fan Tray Door, Roof Mount                                    |
| RTCBF-BAYING-KIT  | Class C and B Baying Kit   |
| RTC-CM42RU600W    | Class C and B Cabinet Vert CM 42RU 600W – Left and Right                     |
| RTC-CM42RU800W    | Class C and B Cabinet Vert CM 42RU 800W – Left and Right                     |
| RTC-CM45RU600W    | Class C and B Cabinet Vert CM 45RU 600W – Left and Right                     |
| RTC-CM45RU800W    | Class C and B Cabinet Vert CM 45RU 800W – Left and Right                     |

Note: Accessories only suitable for Class C and B Series cabinets.

Multi-user Telecommunication Outlet (MUTO Box)

Racktech secure multi-user telecommunication outlets are a quality defence ready enclosure suitable for Government and High Density applications.

Available in standard configurations and a range of standard colours or able to be customised for specific project requirements.

| Part Number | Description   |
|-------------|---|
| RTC-MUTO-RD | Muto Enclosure Red 150 x 150 x 44.2<br>8 x SC Duplex 3mm Clear Acrylics – Top Secret Security     |
| RTC-MUTO-WT | Muto Enclosure White 150 x 150 x 44.2<br>8 x SC Duplex 3mm Clear Acrylics – Unclassified Security |

Class C and Class B Locking Mechanism

CLASS C

CLASS B

Racktech Class C and Class B cabinets provide high-level security for data and communications equipment used in secure network environments.

The Racktech Class C and Class B equipment is endorsed by the Security Construction and Equipment Committee (SCEC) for the protection of classified equipment.

## IP Series

Racktech's IP Series cabinets are designed to protect sensitive data network equipment. Suitable for internal and heavy duty outdoor applications.

## IP Series – IP Rated Cabinets

The Racktech IP Series cabinets are IP66 rated and designed to protect sensitive data network equipment. The cabinets are precision built to ensure a consistent high quality.

The strong powdercoated galvanised steel cabinets are suitable for internal environments and heavy-duty outdoor applications.

Our current stocked range of IP Series cabinets and accessories is listed below.

Customised cabinets (27RU to 45RU) are also available upon request with minimum order quantities.

### Field Cabinet

| Part Number | Field Cabinet                              |
|-------------|--|
| IPF7618     | IP66 Field Cabinet 18RU 700W x 600D – Grey |
| IPF7624     | IP66 Field Cabinet 24RU 700W x 600D – Grey |

### Wall Mount Cabinet

| Part Number | Description                                     |
|-------------|---|
| IPW7606     | IP66 Wall Mount Cabinet 6RU 700W x 600D – Grey  |
| IPW7612     | IP66 Wall Mount Cabinet 12RU 700W x 600D – Grey |
| IPW7618     | IP66 Wall Mount Cabinet 18RU 700W x 600D – Grey |

### Filter and Fan

| Part Number  | Filter and Fan                        |
|--------------|---------------------------------------|
| IPFLTRKIT150 | IP54 Filter 150mm with Vent Hood 320H |
| IPFANKIT150  | IP54 Fan 150mm with Vent Hood 320H    |

IP Series Field Cabinet

IP Series Wall Mount Cabinet

IP54 Fan – front view

IP54 Fan – rear view

IP54 Filter

Vented Hood

### Features

- > IP66-rated enclosures are suitable for various environments
- > Body, door, mounting plate and rail are constructed from 1.5mm galvanised steel
- > Previously fitted blind nuts used for mounting brackets and accessories saves assembly and installation time
- > Door opens to 110°
- > Cabinet height less than 1000mm have 3mm double bit insert quarter turn lock with key
- > Cabinet height greater than 1000mm have three-point locking system with key-lock swing handle
- > High quality polyurethane foam seal is machine applied to the door perimeter to ensure excellent protection
- > Earthing system on frame and door
- > Gland plates are incorporated into the bottom face of the enclosure for cable management with gaskets and fasteners provided

# Considerations when choosing a Power Distribution Unit

A Power Distribution Unit (PDU) is designed to provide electrical protection and distribute power to networking equipment in racks and cabinets.

Outlined below are some considerations before selecting a PDU for your data centre application.

## Future requirements

Consider your data centre requirements. Determine the maximum power throughput necessary to support current power capacities and plan ahead for future electrical loads.

As the requirements of data centres change, the PDU performance required will also need to change or be upgraded. This is especially important considering that rack kW is increasing to support higher-density cabinets.

Planning and purchasing for future power requirements can provide cost savings and is preferable to purchasing new equipment after a few years. A basic power rail will last a lifetime.

## Three-phase power

Investing in three-phase power is superior to single-phase power for the following reasons:

- > Three-phase power keeps amperage low and voltage high, providing cost savings on wiring
- > Three-phase power is able to support higher power loads than single-phase power
- > Load balancing is easier with three-phase power than with single-phase power
- > Three-phase power facilitates scalability, which is vital for long-term operational efficiency

## Vertical PDUs

Vertical PDUs have a smaller footprint, require less cabling and support greater scalability.

As space is one of the most important resources in a data centre, traditional horizontal PDU configurations will be suitable for low-density racks, while vertical PDU installations are preferable for high-density racks.

## Types of PDUs

Modern PDUs come with varying amounts of network connectivity. For many organisations, intelligent PDUs are necessary as they enable remote power monitoring and remote switching. Alternatively, a security conscious business may still find a basic PDU a viable option.

Below we have summarised the features of the different types of PDUs for consideration.

- > **Basic PDU:** The basic PDU is a casing with receptacles that provide power. The basic PDU has a long product life as there are fewer electronic components.
- > **Metered PDU:** A metered PDU is air-gapped from the network and has a graphical user interface (GUI) that displays real-time power metrics. Using a secure mobile device, you can scan the GUI to instantly capture and export the power metric data to a report for your records. Some metered PDUs support visible light communication (VLC).
- > **Monitored PDU:** These internet-connected PDUs enable you to aggregate and view real-time power metrics including voltage, current, power and more from an intuitive web interface. They also support interchangeable monitoring devices (IMD's) so that environmental intelligence such as temperature, humidity and dew point can be added. Monitored PDUs allow you to set defined thresholds, that when breached, trigger automatic alerts to staff.
- > **Switched PDU:** These PDU's enable you to manage a data centre from a long-distance. Switched PDUs let you power cycle individual outlets on the strip from a web interface regardless of your location. For example, if you need to turn a server on and off for maintenance reasons, you can do that from a smartphone from 1,000 km's away from the facility.

# PDUs

Racktech supplies a range of Power Distribution Units with a variety of socket and plug configurations in both vertical and horizontal formats.

## Power Distribution Units

Reliable Power Distribution is critical in any data centre environment. Racktech only supplies Power Distribution Units (PDUs) that meet the highest standards.

The Racktech range of PDUs are manufactured to stringent quality standards using high grade materials before being load tested.

With a variety of socket and plug configurations in both vertical and horizontal formats, there are hundreds of combinations available. The following tables show our most popular 'off the shelf' combinations. Please contact our sales team for other power distribution requirements.

### Australian Standard Socket PDU

| Socket | Plug        | Horizontal     |                | Vertical       |                |
|--------|-------------|----------------|----------------|----------------|----------------|
|        |             | 5 Way          | 10 Way         | 10 Way         | 20 Way         |
| 10A    | 10A         | 9001-RB        | 9003-RB        | 9004 -RB       | 9005-RB        |
|        | 15A         | 9001-RB-15A    | 9003-RB-15A    | 9004-RB-15A    | 9005-RB-15A    |
|        | 10A IEC     | 9001-RB-C14    | 9003-RB-C14    | 9004-RB-C14    | 9005-RB-C14    |
|        | 15A IEC     | 9001-RB-C20    | 9003-RB-C20    | 9004-RB-C20    | 9005-RB-C20    |
|        | 10A Captive | 9001-RB-CAP10F | 9003-RB-CAP10F | 9004-RB-CAP10F | 9005-RB-CAP10F |
|        | 15A Captive | 9001-RB-CAP15F | 9003-RB-CAP15F | 9004-RB-CAP15F | 9005-RB-CAP15F |
|        | 20A Captive | 9001-RB-CAP20F | 9003-RB-CAP20F | 9004-RB-CAP20F | 9005-RB-CAP20F |
|        | 20A Captive | 9001-RB-CAP20R | 9003-RB-CAP20R | 9004-RB-CAP20R | 9005-RB-CAP20R |

### IEC Socket PDU

| Socket | Plug        | Horizontal     | Vertical       |                |
|--------|-------------|----------------|----------------|----------------|
|        |             | 12 Way         | 12 Way         | 20 Way         |
| C13    | 10A         | 9012-RB        | 9008 -RB       | 9009-RB        |
|        | 15A         | 9012-RB-15A    | 9008-RB-15A    | 9009-RB-15A    |
|        | 10A IEC     | 9012-RB-C14    | 9008-RB-C14    | 9009-RB-C14    |
|        | 15A IEC     | 9012-RB-C20    | 9008-RB-C20    | 9009-RB-C20    |
|        | 10A Captive | 9012-RB-CAP10F | 9008-RB-CAP10F | 9009-RB-CAP10F |
|        | 15A Captive | 9012-RB-CAP15F | 9008-RB-CAP15F | 9009-RB-CAP15F |
|        | 20A Captive | 9012-RB-CAP20F | 9008-RB-CAP20F | 9009-RB-CAP20F |
|        | 20A Captive | 9012-RB-CAP20R | 9008-RB-CAP20R | 9009-RB-CAP20R |

### Combination Vertical PDU 20 Way

| Socket | Plug        | 18x C13 and 2x C19 |
|--------|-------------|--------------------|
| C13x18 | 15A         | 9019-RB-15A        |
|        | 15A IEC     | 9019-RB-C20        |
| C19x2  | 15A Captive | 9019-RB-CAP15F     |
|        | 20A Captive | 9019-RB-CAP20F     |
|        | 20A Captive | 9019-RB-CAP20R     |
|        | 20A Captive | 9019-RB-CAP20R     |

## Intelligent PDUs

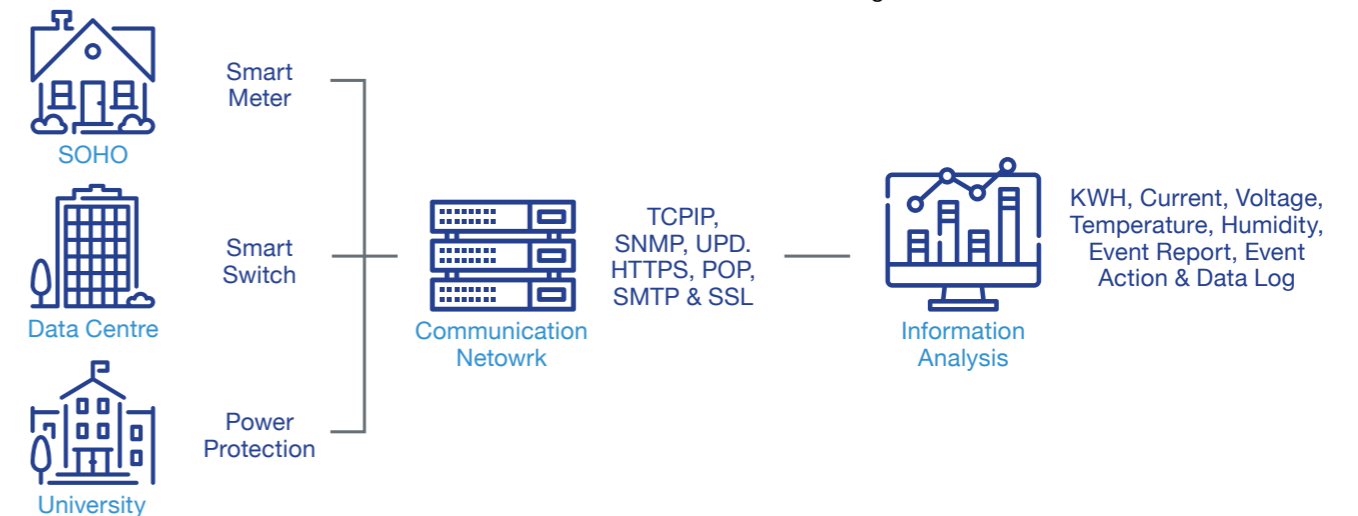

The industry push for efficiency has some end users and industry professionals seeking accurate and effective means to manage their critical power resources so that they can remotely monitor their energy efficiency and reduce their overall power usage.

Racktech has a selection of Intelligent PDUs providing ease of use, accuracy, reliability and functionality whilst returning a low total cost of ownership.

By combining optional temperature and humidity sensors, users can effectively manage their power and server room environment using one easy to use software program from any location.

### Optional Inclusions

- > Total PDU power metering or per outlet metering and monitoring
- > Individual or group power outlet control
- > Scheduled power outlet control
- > Temperature and humidity detection
- > Set alarm thresholds with alarm notifications
- > Single-phase or three-phase PDU
- > 10Amp to 125Amp
- > 240V and 400V
- > Various outlet and plug types are available
- > Central management software

For customised PDU solutions, contact the Racktech Customer Support Team on 1300 550 322 or email [sales@racktech.com.au](mailto:sales@racktech.com.au)

## Monitored PDUs

A Monitored PDU is an entry level intelligent PDU with network interface that enables an IT Manager to monitor total PDU load from a remote interface.

The Monitored PDU provides accurate real time current draw readings enabling users to determine how much room is available before a PDU's capacity is exceeded.

### Features

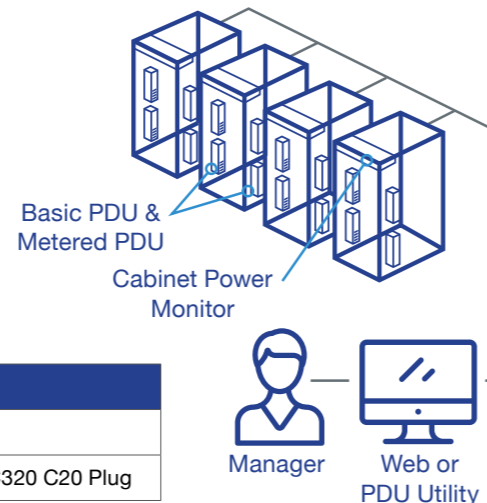

- > **Meter:** True RMS Current Meter
- > **Power Monitor:** Total Power Monitoring by Meter, Web, SNMP, Remote Software
- > **Protocols:** Http, Https, SNMP, DHCP, UDP
- > **Alarm Thresholds:** User-Defined Alarm Thresholds for Warning and Overload
- > **Event Alert:** Email, Trap, Audible Alarm
- > **Temperature/Humidity:** Option Accessory

| Part Number         | Description  |
|---------------------|--|
| IQDG-MTH-1023J-08N1 | Monitored PDU (8)C13 Outlet (1)RJ45, 1U 10A 230V IEC320 C14 Plug             |
| IQDG-MTH-1623K-08N1 | Monitored PDU (8)C13 Outlet (1)RJ45, 1U 16A 230V IEC320 C20 Plug             |
| IQDG-MTV-1623K-16N1 | Monitored PDU (14)C13 (2)C19 Outlet (1)RJ45, 0U 16A 230V IEC320 C20 Plug     |
| IQDG-MTV-3223C-16N2 | Monitored PDU (14)C13 (2)C19 Outlet (1)RJ45 (1)RJ11, 0U 32A 230V IEC309 Plug |
| IQDG-MTV-3223C-24N3 | Monitored PDU (21)C13 (3)C19 Outlet (1)RJ45 (1)RJ11, 0U 32A 230V IEC309 Plug |

## Cabinet Power Monitor (CPM)

A Metered PDU provides power consumption data directly through the PDU panel. A Cabinet Power Monitor can communicate with a Metered PDU to enable remote monitoring of the PDU's power consumption.

| Part Number         | Description  |
|---------------------|--|
| IQDG-CPM-ENV-2      | Temperature/Humidity Probe                                     |
| IQDG-M1H-1623K-08N1 | Metered PDU (8)C13 Outlet (1)RJ45, 1U 16A 230V IEC320 C20 Plug |

## Switched PDUs

A Switched PDU with network interface enables IT administrators to remotely turn on and off each individual power outlet on a PDU.

Authorised users have the ability to remotely control the power supply to their connected devices and remotely power cycle servers, with the benefit of reducing downtime.

Sequential outlet control permits equipment to be powered up and down correctly to ensure proper synchronisation of dependent services. Other uses include disabling unused outlets and restricting unauthorised use of power.

### Features

- > **Meter:** True RMS Current Meter
- > **Power Monitor:** Total Power Monitoring by Meter, Web, SNMP, Remote Software
- > **Protocols:** Http, Https, SNMP, DHCP, UDP
- > **Outlet Control:** Individual
- > **Power Delay:** Power On/Off Sequence can be defined
- > **Alarm Thresholds:** User-Defined Alarm Thresholds for Warning and Overload
- > **Event Alert:** Email, Trap, Audible Alarm
- > **Temperature/Humidity:** Option Accessory

| Part Number         | Description   |
|---------------------|---|
| IQDG-SWH-1023J-08N1 | Switched PDU (8)C13 Outlet (1)RJ45, 1U 10A 230V IEC320 C14 Plug             |
| IQDG-SWH-1623K-08N1 | Switched PDU (8)C13 Outlet (1)RJ45, 1U 16A 230V IEC320 C20 Plug             |
| IQDG-SWV-1623K-16N1 | Switched PDU (14)C13 (2)C19 Outlet (1)RJ45, 0U 16A 230V IEC320 C20 Plug     |

## Per Outlet Monitoring (POM)

A Per Outlet Monitoring PDU enables authorised users to remotely drill down to individual outlets and obtain a quick and accurate measurement of the true power being consumed by a specific device by viewing the network interface.

Knowing a device's true power consumption enables IT loads to be efficiently balanced between Server cabinets.

Servers with static power consumption become quickly identified and considered for consolidation, virtualisation or retirement.

Scheduled outlet control enables devices to be turned on and off automatically to meet dedicated hours of operation or maintenance procedures set for a particular time each day or week.

Power cycling can be automated for locked devices by monitoring their IP address. Outlets can also be assigned into group access for colocation requirements, limiting access to the entire PDU by unauthorised personnel.

### Features

- > **Meter:** True RMS Current Meter
- > **Power Monitor:** Per Outlet Output, Current and Total Power Monitoring by Meter, Web, SNMP and Remote Software
- > **Protocols:** Http, Https, SNMP, DHCP and UDP
- > **Outlet Control:** Individual, Group, Schedule and Auto Ping
- > **Power Delay:** Power On/Off Sequence can be defined
- > **Alarm Thresholds:** User-Defined Alarm Thresholds for Warning and Overload
- > **Event Alert:** Email, Trap, Audible Alarm
- > **Temperature/Humidity:** Optional Accessory

| Part Number         | Description  |

## Accessories

Racktech have an extensive range of accessories comprising fan units, cable managers and shelves suitable for all project requirements.

## Fan Units

High temperatures are a data centre's greatest enemy as excessive heat build up deteriorates the performance of sensitive equipment and reduces the product life.

Racktech can provide a range of equipment to eliminate heat concerns, from fan units through to airconditioning, hot and cold aisle containment systems, and accessories to expel heat or increase chilled air entering the cabinet.

Contact our sales team for advice on how to best manage your cooling requirements.

### Features

- > Fans improves air flow
- > Finger guards installed top and bottom and totally flush on top panel of frame
- > Low noise level fans
- > Supplied complete with 2.5m lead and 3-pin plug
- > Whisper quiet fans available on request for sensitive office environments
- > Thermostat controlled fans available on request

### Fan Kits (1-Fan Unit)

- > Suits RT2 Series and 450 depth WR Series

| Part Number | Description          |
|-------------|----------------------|
| 9181        | 1 fan unit           |
| 9181-W      | 1 fan unit – Whisper |

### Fan Kits (2-Fan Unit)

- > Suits RT2 Series and 600 depth WR Series

| Part Number | Description                       |
|-------------|-----------------------------------|
| RT9182      | 2 fan unit                        |
| RT9182-W    | 2 fan unit – Whisper              |
| RT9182-TH   | 2 fan unit – Thermostat           |
| RT9182-W-TH | 2 fan unit – Whisper/Thermostatic |

### Fan Kits (4-Fan Unit)

- > Suits RT2 Series of any depth
- > Only suitable for RT2 Series

| Part Number | Description                       |
|-------------|-----------------------------------|
| RT9183      | 4 fan unit                        |
| RT9183-TH   | 4 fan unit – Thermostat           |
| RT9183-W    | 4 fan unit – Whisper              |
| RT9183-W-TH | 4 fan unit – Whisper/Thermostatic |

### Fan Kits (6-Fan Unit)

- > Suits RT2 Series 1000mm and 1200mm depth cabinet only

| Part Number | Description                       |
|-------------|-----------------------------------|
| RT9186      | 6 fan unit                        |
| RT9186-TH   | 6 fan unit – Thermostat           |
| RT9186-W    | 6 fan unit – Whisper              |
| RT9186-W-TH | 6 fan unit – Whisper/Thermostatic |

### Digital Temperature Control Unit 1RU

- > Modular unit suitable for all cabinets
- > Comes with IEC C14 and 10A SAA outlet

| Part Number | Description                          |
|-------------|--------------------------------------|
| 9450        | Digital Temperature Control Unit 1RU |

### Filter Kit for Side Panel

- > A full range of filters are available to suit your needs
- > Filters can be added during production or retrofitted
- > Prevents dust ingress into cabinet by filtering and blocking micro particles
- > Filter kit consists of filter guide, double-sided tape and dust filter

| Part Number | Depth (mm) |
|-------------|------------|
| 9006        | 600        |
| 9007        | 800        |
| 9103        | 900        |
| 9105        | 1000       |
| 9106        | 1200       |

### Fan Filter

- > Not suitable for 2-fan cantilever shelves
- > Prevents dust ingress into cabinet by filtering and blocking micro particles

| Part Number | Description |
|-------------|-------------|
| 9076        | 2 fan unit  |
| 9077        | 4 fan unit  |

### Airflow and Noise Level Rating

| Fan Type (single unit) | Air flow (CFM) | Noise Level (dBA) |
|------------------------|----------------|-------------------|
| Standard Fan           | 87/100         | 45/50             |
| Whisper Fan            | 60             | 26                |

Note: Above details based on single fan

## Cable Management

### Vertical Cable Management

- > Designed to handle high density cabling, for termination or patching applications
- > All fasteners provided
- > Suitable for RTX and RT2 Series only

| RU        | Part Number  | Width |
|-----------|--------------|-------|
| 155 Depth |              |       |
| 18RU      | iQCM1860     | 80    |
| 27RU      | iQCM2760     |       |
| 38RU      | iQCM3860     |       |
| 42RU      | iQCM4260     |       |
| 45RU      | iQCM4560     |       |
| 205 Depth |              |       |
| 18RU      | iQCM1860-150 | 80    |
| 27RU      | iQCM2760-150 |       |
| 38RU      | iQCM3860-150 |       |
| 42RU      | iQCM4260-150 |       |
| 45RU      | iQCM4560-150 |       |

### Horizontal Cable Management

- > Supports and ensures bending radii are met
- > Routing of cable to maximise capacity
- > Suitable for all 19" racks

| RU              | Part Number  |
|-----------------|--------------|
| 93mm T-Fingers  |              |
| 1RU             | iQOF9509     |
| 2RU             | iQOF9502     |
| 4RU             | iQOF9512     |
| 146mm T-Fingers |              |
| 1RU             | iQOF9509-150 |
| 2RU             | iQOF9502-150 |
| 4RU             | iQOF9512-150 |

### 1RU Cable Ring

- > Cable rings are sold separately and snap into all standard cagenut holes

| RU  | Part Number |
|-----|-------------|
| 1RU | 9046        |

### 1RU Cable Ring with Bracket

- > Mount to side of 'L' rail
- > Finger can be rotated 90°

| RU  | Part Number |
|-----|-------------|
| 1RU | 9046-VWC    |

### 1RU Cable Ring Panel

- > 5 horizontal cable rings
- > Can be used with all 19" cabinets and wall mounted frames

| RU  | Part Number |
|-----|-------------|
| 1RU | 9045        |

### Lacing Bar

- > 19" racks mountable
- > Used for cable management in the rear of a patch panel
- > All fasteners provided

| Part Number | Dimension   |
|-------------|-------------|
| 9091        | 1RU x 483mm |

### 1RU and 2RU Horizontal Cable Manager

- > All metal construction is superior to plastic counterparts
- > Easy snap fit cover

| RU  | Part Number |
|-----|-------------|
| 1RU | 9218        |
| 2RU | 9198        |

### Roof Brushed Cable Entry

- > Protects cable bundles on cabinet entry
- > Reduces dust infiltration into the cabinet
- > Easy to mount
- > Nylon brush
- > Only suitable for RT2 Series and RTX Series

| Part Number | Slot Dimensions |       |
|-------------|-----------------|-------|
|             | Width           | Depth |
| 9286        | 219             | 78    |

## Cable Management Ring 19" and 26"

- > Retains cable in an orderly manner
- > Designed to maximise area for vertical cable management, between shelf rails and side panels
- > All fasteners provided
- > Zinc annealed steel
- > Black powercoated finish

| Part Number | Width | Depth           | Description               |
|-------------|-------|-----------------|---------------------------|
| 9403-VL     | 30    | 150<br>Internal | 19" (600mm wide) vertical |
| 9046-VL     | 55    |                 | 26" (800mm wide) vertical |

## T-Finger Cable Management

- > Suitable for 600mm and 800mm wide cabinets with L rails
- > Fits neatly alongside vertical rails within 600mm wide cabinets

| Part Number   | Usable Depth                     |
|---------------|----------------------------------|
| iQCM08100     | 93mm T-Finger 8RU single module  |
| iQCM08100-150 | 146mm T-Finger 8RU single module |
| iQCM42100     | 93mm T-Finger 42RU               |
| iQCM45100     | 93mm T-Finger 45RU               |
| iQCM42100-150 | 146mm T-Finger 42RU              |
| iQCM45100-150 | 146mm T-Finger 45RU              |

## Cable Trays

- > Easily installed
- > All fasteners included
- > Available in 12RU, 18RU, 27RU, 38RU, 42RU and 45RU
- > Not suitable for iQ Series

| Part Number | Width |
|-------------|-------|
| RT**51      | 150   |
| RT**52      | 225   |
| RT**53      | 300   |
| RT**54      | 400   |
| RT**55      | 450   |

**Note:** \*\* = height of cabinet in RU

## Horizontal Brush Cable Entry

- > Can be used with all 19" equipment rails
- > Allows cable to penetrate the cabinet while preventing dust ingress
- > Helps prevent recirculation of hot air in cabinet
- > Enables better management of cold air circulation in cabinet
- > Aids front to rear cable entry
- > All fasteners provided

| RU  | Part Number | Slot Dimensions |       |
|-----|-------------|-----------------|-------|
|     |             | Width           | Depth |
| 1RU | 9284        | 390             | 25    |
| 2RU | 9285        |                 | 60    |

## Blank Panels

- > Used for aesthetics or to create an air dam
- > Complete with fixing hardware

| RU  | Part Number |
|-----|-------------|
| 1RU | 9041        |
| 2RU | 9042        |
| 3RU | 9043        |
| 4RU | 9044        |
| 6RU | 9202        |

## Eziblack® Blank Panels

- > Easy to use
- > Saves money
- > Simple to install
- > Fits any rack size
- > Enhanced efficiency
- > Environmentally friendly

| Part Number  | Description   |
|--------------|---|
| RTDC-BKPNL01 | Per box of 10<br>(10 x 6RU blanking panels – Black) |

## Telescopic Chimney

- > Adjustable height up to 1270mm
- > Can be retrofitted around an existing cable installation
- > Large cable access area
- > Easily suits cable entry on top panel
- > Only suitable for RT2 Series and RTX Series

| Part Number | Height | Width | Depth |
|-------------|--------|-------|-------|
| 9230-RB     | 750    | 375   | 75    |

**Note:** Chimney height is adjustable from 750mm to 1270mm high.

## Fixed Cabinet Chimney

- > To facilitate and enclose cable entry from ceiling to cabinet
- > All fasteners provided
- > Custom sizes upon request (MOQ)
- > Easily suits cable entry on top panel
- > Only suitable for RT2 Series and RTX Series

| Part Number | Width              |
|-------------|--------------------|
| 9078-RB     | 900h x 225w x 75d  |
| 9079-RB     | 1200h x 225w x 75d |

## Shelves

### Cantilever Shelves

- > Easily installed
- > All fasteners included
- > Suitable for all 19" cabinets
- > Suitable for 19" wall mount cabinets
- > Suitable for all 19" open frames
- > Vented for better cooling

| RU  | Part Number | Width | Depth | Load Capacity |
|-----|-------------|-------|-------|---------------|
| 1RU | 9021        | 483   | 170   | 20kg          |
| 2RU | 9022        |       | 275   | 25kg          |
| 3RU | 9023        |       | 390   | 30kg          |

### Fixed Shelves

- > Heavy duty load bearing capacity of 100kg
- > Fully vented
- > Fixing screws concealed from view
- > Easily installed
- > Fixed shelves are supplied with mounting brackets

| Part Number | Width | Depth | Description                |
|-------------|-------|-------|----------------------------|
| 9024        | 449   | 400   | 19" x 600mm deep cabinets  |
| 9025        |       | 450   | 19" x 600mm deep cabinets  |
| 9026        |       | 600   | 19" x 800mm deep cabinets  |
| 9080        |       | 700   | 19" x 900mm deep cabinets  |
| 9086        |       | 800   | 19" x 1000mm deep cabinets |
| 9088        |       | 900   | 19" x 1000mm deep cabinets |

### Sliding Shelves

- > Slide to full length
- > Load capacity of 50kg
- > Ball bearing slide for greater control of heavy loads
- > Fasteners included
- > Fully vented
- > Easily installed

| Part Number | Description                          |
|-------------|--------------------------------------|
| 9028        | 400mm runner (for 600 deep cabinet)  |
| 9029        | 600mm runner (for 800 deep cabinet)  |
| 9082        | 700mm runner (for 900 deep cabinet)  |
| 9087        | 800mm runner (for 1000 deep cabinet) |

### Pivoting Keyboard Shelf

Keyboard and mouse not included.

- > Allows for a standard width keyboard to be used in a 19" cabinet
- > Shelf must be withdrawn before keyboard tray can be pivoted for use

| Part Number | Suitable for cabinets |
|-------------|-----------------------|
| 9161-400    | 600mm deep cabinet    |
| 9161        | 800mm deep cabinet    |
| 9161-700    | 900mm deep cabinet    |

### Adjustable Shelf Rails

- > This product is user-friendly, easy to install, strong, lightweight and adjustable from 500mm to 880mm. Unlike shelves, these rails take up no RU space and do not affect air flow
- > The equipment support brackets mount easily to rails, providing a strong base for all types of 19", 21" and 26" equipment
- > Suitable for up to 1000mm deep cabinets
- > Supplied in pairs

| Part Number         | Suitable for Cabinets |
|---------------------|-----------------------|
| S-KIT-SRL-01-500925 | 500 to 880            |

## General Accessories

### Cabinet Plinth

- > Raises cabinet 50mm off the floor
- > Provides cable entry at rear of plinth
- > Load capacity of 250kg max (UDL)
- > Only suitable for RT2 Series
- > Not compatible with castors or levelling feet

| Part Number              | Description              |
|--------------------------|--------------------------|
| <b>600mm Wide Plinth</b> |                          |
| RT9051                   | 600mm Wide x 600mm Deep  |
| RT9052                   | 600mm Wide x 800mm Deep  |
| RT9151                   | 600mm Wide x 900mm Deep  |
| RT9153                   | 600mm Wide x 1000mm Deep |
| RT9174                   | 600mm Wide x 1200mm Deep |
| <b>800mm Wide Plinth</b> |                          |
| RT9150                   | 800mm Wide x 600mm Deep  |
| RT9069                   | 800mm Wide x 800mm Deep  |
| RT9152                   | 800mm Wide x 900mm Deep  |
| RT9156                   | 800mm Wide x 1000mm Deep |
| RT9175                   | 800mm Wide x 1200mm Deep |

**Note:** Not suitable for use with bottom panel

### Cabinet Plinth Gland

- > Provided to cover cable entry holes on plinth
- > 4 x Gland Plates for 600mm wide plinth
- > 5 x Gland Plates for 800mm wide plinth
- > Only suitable for RT2 Series

| Part Number |
|-------------|
| 9232-RB     |

Earthing Kit

- > 400mm long earthing cable
- > Earthing kit consists of M6 rings at each end, 2 x M6 studs, 4 x M6 star washers

| Part Number |
|-------------|
| 9402        |

Earthing Bar

- > Copper earth bar is 3mm thick with slotted and threaded holes

| Part Number |
|-------------|
| C**55       |

Note: \*\* = height of cabinet in RU

Fastener Kit

- > Fastener Kits consist of M6 cage nuts, M6 screws and M6 flat washers in a set of 4 or a set of 100

| Part Number | Description               |
|-------------|---------------------------|
| 9074        | Fastener kit (set of 4)   |
| 9075        | Fastener kit (set of 100) |

Baying Kit

- > Cabinets can be bayed externally
- > Easily installed
- > Baying kit consist of baying bracket and fasteners
- > Only suitable for RT2 Series

| Part Number | Description                                   |
|-------------|---|
| 9400        | RT2 cabinet corners baying bracket kit (pair) |

Anti-Tilt Bracket – For RT2 Series only

- > To be used with levelling feet
- > Anti-tilt brackets are supplied with fasteners, excludes floor bolts

| Part Number | Description                          |
|-------------|--------------------------------------|
| 9038        | Levelling foot anti-tilt clamp (set) |

Recessing Bracket

- > Allows recessing of equipment deep into the cabinet
- > Two recessing brackets are supplied with fasteners

| Part Number | Description                         |
|-------------|-------------------------------------|
| 9237        | 1RU 50mm recessing brackets (pair)  |
| 9237-100    | 1RU 100mm recessing brackets (pair) |
| 9228        | 2RU 100mm recessing brackets (pair) |

Levelling Feet (Set of 4)

- > Maximum load capacity of 500kg
- > Feet attach directly to frame for stability
- > Levelling feet are fully adjustable
- > Feet can raise cabinet enclosure 60mm off th ground
- > Optional bottom panel with cable entry cut-out available upon request
- > Solves uneven floor issues
- > Only suitable for RT2 Series

| Part Number | Description   |
|-------------|---|
| 9039-M      | RT2 cabinet levelling feet (set of 4 – M10 plastic) |

Cabinet Castors (Set of 4)

- > Castors attach directly to cabinet frame for extra stability and support
- > Front castors have brakes
- > Castors raise the cabinet 100mm off the ground
- > Maximum load capacity of 250kg (UDL)
- > Bottom plate with cable entry cut-out available upon request
- > Only suitable for RT2 Series

| Part Number | Description                              |
|-------------|--|
| 9040-M      | RT2 cabinet castor wheels (set of 4)     |
| 9040-M-KIT  | RT2 cabinet castor wheel kit (set of 4)* |

\*Order the 9040-M-KIT when retrofitting castors to an existing RT2 Series cabinet on site.

Rear Wall and Floor Mount Kit

- > One size is suitable for all cabinets
- > Top and bottom supplied as one unit
- > Maximum weight is determined by wall strength and fasteners
- > Easily installed
- > Rear wall and floor mount kit is supplied with fasteners, excludes wall and floor bolts
- > Only suitable for RT2 Series

| Part Number |
|-------------|
| 9073-BL     |

Document Holder

- > Usually installed on the rear of steel doors
- > Affixed with industrial strength adhesives

| Part Number | Description              | Dimension      |
|-------------|--------------------------|----------------|
| 9095-BL     | A4 metal document holder | 250 x 250 x 32 |

Fixed Fiber Enclosure

- > Suitable for all 19" wide cabinets
- > Internal cable management
- > Able to accommodate splice cassettes
- > Four entry points

| RU  | Part Number | Width | Depth | Description  |
|-----|-------------|-------|-------|--|
| 1RU | 9065        | 600   | 220   | 24-way ST fixed fiber tray with lid. Accepts 24 x ST couplers  |
|     | 9066        |       |       | 24-way SC fixed fiber tray. Holds 12 x duplex couplers   |
|     | 9067        |       | 200   | 12-way ST fixed fiber tray with lid. Accepts 16 x ST couplers  |
|     | 9060        |       |       | 12-way SC fixed fiber tray with lid. Holds 6 x duplex couplers   |
|     | 9263        |       |       | 24-way LC duplex fixed fiber tray. Holds 24 x LC duplex couplers. Can also hold 24 x SC simplex couplers |

# Fiber Optic Products

Racktech offers a selection of MICOS TELCOM integrated solutions and compatible products for builders and operators of telecommunication and data centre networks.

## Micos Fiber Optic Products

The MICOS TELCOM product portfolio comprises more than 1000 items. All products are developed in the EU to the high standards required by global telecommunication network and data centre operators.

### ORMP Drawer Type ODF

The ORMP drawer type ODF has been designed to accommodate the placement of 24/48/72/144 optical connectors indoors. The design of the patch panel is able to be installed into a 19" rack.

#### Features

- > Capacity of 24 to 144 optical connectors
- > Can accommodate LC or SC connectors
- > Needle holder of optical splice trays
- > Able to store excess optical fiber
- > Fiber management cable rings
- > Able to fit with PG bushings
- > Side depth adjustable 19" mounting kit
- > Height of 1RU, 2RU or 3RU
- > Easy assembly

ORMP 1RU 24SC/48LC

ORMP 2RU 72SC/144LC

### ORMPV Hinged ODF

The ORMPV hinged module patch panel is designed to place 24/48/96/144 optical connectors indoor. The design of the panel enables installation in a 19" rack.

#### Features

- > Capacity of 24 to 144 optical connectors
- > Connector holder SC simplex, ST, FC, LC, SC duplex
- > Optical splice tray holder
- > Able to store excess optical fiber
- > Installation into a 19" base, front or rear mounted
- > Cable can enter from the rear or the side
- > Side depth adjustable 19" mounting kit
- > Height of 1RU, 2RU or 3RU
- > Easy assembly

ORMPV 1RU

ORMPV 2RU

### UHD ORMP 1RU / UHD ORMP 2RU Fiber Optic Patch Panel

The UHD ORMP 1RU and UHD ORMP 2RU Ultra High Density Fiber Optic Patch Panels, are pre-assembled according to your exact specifications to enable splicing right out of the carton, providing time and labour savings.

Each patch panel is made from rugged alu-zinc metal and has a durable powder-coat finish. The craft-friendly COYOTE® Fiber Optic Trays and integrated fiber storage allows for easy assembly.

#### Features

- > Capacity up to 144 splices for 1RU version
- > Capacity up to 288 splices for 2RU version
- > Capacity up to 72 x SC / 144 x LC connector for 1RU version
- > Capacity up to 144x SC / 288x LC connector for 2RU version
- > Increased corrosion resistance (alu-zinc material)
- > High connector density with removable patchcord support
- > Depth adjustable 19" mounting brackets
- > Large Fiber Optic Trays with transparent lid
- > Removable Fiber Optic Trays to facilitate easy installation and maintenance
- > Space for a fiber storage under the trays
- > Optional splice holders, single fiber or ribbon

Ultra High Density Fiber Optic Patch Panel  
UHD ORMP 1U 144LC

Ultra High Density Fiber Optic Patch Panel  
UHD ORMP 2U 288LC

### POR 48 Wall-mounted Optical Distribution Box

Wall mounted fiber optical box designed for the placement of up to 48 optical connectors indoor. Optical cables can enter/exit from either the top or bottom of the box. Adapters plates are selectable for SC or LC style connectors and the splice tray is removable for easy installation and maintenance.

#### Features

- > Maximum capacity 24 SC or 48 LC connectors
- > Integrated cable excess fiber storage
- > Cable management
- > Rubber bushings
- > Two lockable doors – two different locks
- > Outdoor version available upon request

POR 48 Wall-mounted Optical Distribution Box

## UPS Systems

Uninterruptible Power Supply Systems provide protection and monitoring that support mission-critical servers, telecom equipment, VoIP and networking hardware.

## MX Series 1.1, 2, 3 kVA

### Reliable power protection for small to medium sized enterprises

The DELTA Amplon MX line-interactive UPS provides pure sine-wave quality compatibility for versatile applications and protects devices from power failure and voltage variations with a small footprint.

The Amplon MX series features enhanced output power factor 0.9, AVR efficiency up to 96.5%, resulting in a greater power supply for critical loads at significantly less operating cost.

### Features and Benefits

- › Microprocessor-based line interactive design for fast response to power disturbances
- › Programmable load bank disconnects non-critical loads when a blackout occurs and reserves more battery power for critical loads
- › Automatic voltage regulator (AVR) delivers stable output voltage during break-outs or over-voltages
- › Wide input voltage range allows the UPS to work in harsh electrical environments
- › Hot-swappable battery design to protect equipment during battery replacement

### Flexibility

- › Supports both rack and tower installation
- › Management through a user-friendly graphical and easy-shift LCD display
- › Supports multiple communication interfaces, including USB port, RS-232, Mini Slot, Surge Protection, REPO for enhanced monitoring and manageability

### Low Total Cost of Ownership

- › Output power factor is up to 0.9 to provide more real power to critical loads
- › High efficiency normal mode reach at 98% and 98.5% for 3kVA
- › Wide input range and protection against over voltage prolongs the battery life

### MX Series Applications

| Part Number            | VA   | Watts | Power Factor | Output Voltage (Vac)        | Typical Backup Time (min) | Outlets     |
|------------------------|------|-------|--------------|-----------------------------|---------------------------|-------------|
| RTUPSD-UPA112M2MX0B0BB | 1100 | 990   | 0.9          | 221 ± 1% 230 ± 1% 240 ± 10% | 10 (Half Load)            | IEC C14 x 1 |
| RTUPSD-UPA202M2MX0B0BB | 2000 | 1800  | 0.9          | 222 ± 1% 230 ± 1% 240 ± 10% | 10 (Half Load)            | IEC C20 x 1 |
| RTUPSD-UPA302M2MX0B0BB | 3000 | 2700  | 0.9          | 222 ± 1% 230 ± 1% 240 ± 10% | 10 (Half Load)            | IEC C20 x 1 |

## RT Series 1, 2, 3 kVA

### Reliable power with greater energy-saving features

The DELTA Amplon RT 1-3kVA series is an online double-conversion UPS providing consistent sine-wave power to critical equipment.

It supports personal computers, networks, servers, VoIP and telecommunications. The Amplon RT 1-3kVA series features an output power factor of 0.9 and best-in-class AC-AC efficiency up to 94% resulting in greater energy-savings. Optional external battery pack can be connected for longer backup time to keep your applications safe and running smoothly at all times.

### Features and Benefits

- › True online double-conversion topology and zero transfer time to battery ensures high reliability
- › Watch-dog design of Digital Signal Processor (DSP) increases reliability
- › Cold-start capability provides temporary battery power when the utility power is out
- › Fan failure detection alerts users to failed fans
- › Hot swappable batteries ensure continuous operation even when batteries are being replaced
- › Optional external battery pack for easy scaling of longer backup time
- › Operation temperature tolerance up to 50°C ensures critical load continuity
- › High output power factor 0.9 provides more real power to critical loads

### Green and Low TCO

- › High input power factor (pf > 0.99) and low harmonic distortion (iTHD < 5%) saves additional investment
- › Up to 94% AC-AC efficiency and 97% efficiency in ECO mode result in marked energy cost savings
- › Wide input voltage range reduces the chance of using the battery and extends the battery life
- › Intelligent battery management enhances the battery life and performance
- › Fan speed control by load level maximises efficiency and reduces audible noise

### Flexibility

- › Load segment control allows less-critical loads to be disconnected during blackouts and saves battery runtime for important loads
- › Convertible rack and tower configuration in 2RU size cabinet
- › Excellent local communications through rotatable LCD display
- › Intelligent management software connectivity via RS232 or USB port

### RT Series Applications

| Part Number            | VA   | Watts | Output Voltage (Vac)       | Typical Backup Time (min) | Outlets              |
|------------------------|------|-------|----------------------------|---------------------------|----------------------|
| RTUPSD-UPS102R2RT2B0BB | 1000 | 900   | 220 ± 1% 230 ± 1% 240 ± 1% | 6.5                       | IEC C13 x 6, C19 x 1 |
| RTUPSD-UPS202R2RT2B0BB | 2000 | 1800  | 221 ± 1% 230 ± 1% 240 ± 1% | 7.5                       | IEC C13 x 6, C19 x 1 |
| RTUPSD-UPS302R2RT2B0BB | 3000 | 2700  | 222 ± 1% 230 ± 1% 240 ± 1% | 7.5                       | IEC C13 x 6, C19 x 1 |

## RT Series 5, 6, 8, 10, 15, 20 kVA

### RT Series 5, 6, 8, 10 kVA Single Phase UPS and 15, 20 kVA Three Phase UPS

The DELTA Amplon RT Series 5-20kVA is an online double-conversion UPS that provides a quality design, high power density, system efficiency, and versatile configurations in a compact 2RU size.

Unity output power factor maximises capacity for more critical loads, while outstanding energy-savings can be achieved based on the AC-AC efficiency of up to 96.5% and 99% in ECO mode.

The RT Series 5-20kVA UPS is the first in the market that offers standard Li-ion external battery cabinets, which deliver better power density and sustainability.

Along with the parallel capacity of up to four units, the new series is the ideal small power UPS for mission-critical applications, such as servers, data centres, telecommunications, and manufacturing.

The DELTA Amplon RT Series provides a total solution for reliable power with high availability and performance.

### RT Series Applications

| Part Number            | VA    | Watts | Power Factor | Output (Vac)               | Typical Backup Time (min) |
|------------------------|-------|-------|--------------|----------------------------|---------------------------|
| RTUPSD-UPS502R2RT0B035 | 5000  | 5000  | 1            | 220 ± 2% 230 ± 2% 240 ± 2% | 6.5                       |
| RTUPSD-UPS602R2RT0B035 | 6000  | 6000  | 1            | 220 ± 2% 230 ± 2% 240 ± 2% | 7.5                       |
| RTUPSD-UPS103R2RT0B035 | 10000 | 10000 | 1            | 220 ± 2% 230 ± 2% 240 ± 2% | 7.5                       |

## Additional Models

### Ultron HPH 20, 30, 40 kW

- › Fully Rated power KVA=KW
- › Leading AC-AC efficiency up to 96% = Energy-savings
- › Wide input voltage range allows the UPS to operate in unstable electrical environments
- › Built-in manual bypass ensures continuous power even when UPS is under maintenance
- › N+X parallel redundancy and capacity expansion capability
- › LCD display and LED indicators
- › 2 x Com slots
- › Front access internal hot swap battery with tray

### Modular UPS DPH Series 25-75, 150, 200 kW

The next generation of modular uninterruptible power supply systems (UPS systems) designed for ultimate availability, excellent performance and high efficiency. An integrated power solution in a Small Form Factor that is ideal for medium-sized datacenters.

### Modular UPS DPH Series 50-300, 500, 600 kW

The Delta Modulon DPH series UPS 50-300, 500, 600 kVA achieves the industry's leading power density of 50 kW per module, offering the smallest footprint and best space utilisation. Arguably the world's highest power density in a single or dual rack.

# Hot & Cold Aisle Containment

Racktech offers a range of airflow management solutions for hot and cold aisle containment applications.

## Aisle Containment Solutions

### Racktech is the Australian Distributor of Polargy Hot and Cold Aisle Containment solutions

Since 2007 Polargy has been the world leader in the design and manufacture of hot and cold aisle containment solutions for new and retrofit data centres.

Polargy is the provider of choice for many world-class mission critical facilities owners and operators.

Polargy containment is deployed by customers including Facebook, Verizon, Pixar Animation, Barclays and Dell.

Racktech will provide a complete solution from design consultation to installation.

### Innovative Solutions

Drawing on years of experience servicing the top mission critical operators, Polargy together with Racktech have a deep insight into all aspects of data centre infrastructure and have developed ingenious solutions to common and costly problems.

### Hot Aisle Containment

Containing the hot aisle is important in new data centre construction. Hot aisle containment focuses on isolating hot exhaust air on its return to the CRAC units or on its way out of the building.

Architects and Engineers have widely adopted the hot aisle containment method of air segregation in new data centre builds for the follow reasons:

- > Designs that flood the whole room with cold air are easy to build
- > It is much easier to achieve airflow balance with a common cold zone
- > A common cool area in the space is more comfortable for users

Drawing of Hot Aisles

### Cold Aisle Containment

Containing the cold aisle has been the most common approach for energy efficiency retrofits, colocation and wholesale providers.

Cold aisle containment confines the cold supply air within the aisle so that it is only available to the equipment and cannot escape over the top of the aisle or out the ends of the aisle.

The most common approach for this aisle containment is end doors and roof panels on a raised frame with perimeter CRAC's.

Cold aisle containment is widely used on retrofits of an existing site as it avoids the need to modify fire suppression equipment and fits below existing cable trays and other obstructions.

Colocation and wholesale providers like this method because it provides flexibility for layout changes. With individual contained cold aisles it is particularly important to monitor and balance the airflow within the aisles.

Cabinet Supported Cold Aisle Containment

### Prefabricated Containment Systems

Racktech, together with Polargy are changing the way containment is deployed during new construction to bring relief to installation schedules and budgets.

Polargy's pre-fabricated, flat pack system is a smarter way to build because it can be installed in half the time of traditional stick built systems and costs significantly less.

As aisle containment is in the last phase of the project, speeding up the installation time provides a tremendous advantage to meeting schedules.

### Aisle End Containment Doors

Great doors make for a great user experience in a contained data centre. Easy opening, smooth sliding, no threshold, auto closing and hold open features are attributes of Polargy aisle end doors.

A variety of aisle end containment doors are available including Polargy's unique, adjustable height sliding doors and easy to install swing doors.

### Aisle Containment Roof Panels

The polargy drop-away panel for use below sprinkler heads is another industry first from Polargy. These UL certified drop away panels resolve the 'sprinkler head obstruction' problem associated with deploying containment. This unique hot and cold aisle containment solution is deployed horizontally across the aisles to create a tight containment barrier.

The panels are made of an aluminium frame with a special translucent insert. The panels are heat sensitive and fall away in high heat, allowing access for suppression systems. They are designed for use underneath lighting and fire suppression systems and are engineered to drop out in the event of a fire.

### Containment Panels

Polargy containment panels are an attractive solution for isolating above and around racks. They are typically deployed vertically to create an attractive, modular containment barrier.

Made of anodized aluminium framing and fire safe inserts, the Polargy containment panels are lightweight, cost effective and attractive looking. Systems can be ceiling suspended with an innovate quick connect and quick removal design or alternatively secured to rack tops or the floor.

### Curtain Panels And Strip Curtain Doors

Polargy containment curtains are an economical way to eliminate hot spots and overcooled zones.

Made of high grade vinyl and installed with Polargy's trouble free mounting system they are easy to install and flexible to redeploy.

Ceiling Supported Hot Aisle Containment

Cabinet Supported Hot Aisle Containment

Floor Mounted Hot Aisle Containment

## Aisle Containment Construction Methods

Aisle containment manages airflow within a data centre by isolating hot aisles and cold aisles from each other, preventing the mixing of hot and cold airstreams.

This enables hot air to be returned to the CRAC unit at a higher temperature, increasing CRAC efficiency and most importantly enables chilled air leaving the CRAC to remain unadulterated before it reaches the equipment, providing uniform server inlet temperatures.

### Key Benefits

- > Turn off CRAC units
- > Reduced hot air recirculation
- > Increased CRAC set points
- > Significantly lower on-going energy costs
- > Increased equipment reliability and fewer hot spots
- > Added server capacity promoting deferred capital expenditure

### Engineering and Design Support

Racktech engineers offer design support for hot and cold aisle containment projects of any size and can supply CAD drawings.

We also provide design support for architects and engineers at the initial development stage of the project design.

For retrofits with less specific documentation, Racktech can prepare basic documents from layout drawings and site measurements.

With a multitude of options and methods available, Racktech can provide engineering support to ensure the most efficient solution is provided for your installation.

A full range of data centre product solutions are available upon request.
